

SHOW ME THE MATH

12

Name _____

Two people are planning to donate 12% of their yearly income to a holiday toy drive for under privileged children. To do this, they must save up over the year. How much will they need to withhold from their weekly pay check to meet their goal of 12% of their year's wages.

There are 52 weeks in a year.

Their combined weekly pay is \$1490.

Determine how much will be needed to save each week and the total amount they will have saved at the end of the year.

12% of their weekly pay: _____

Total amount saved over the year: _____
