

SHOW ME THE MATH

Name _____

A concrete slab is used in home construction. How much will the concrete cost if a 6''x2'x2' or 4 ft² takes four 60 lbs bags?

With a 6-inch base for the entire floor, determine the amount of concrete needed and the cost.

Concrete
60 lb. bag
\$3.25
Amounts over 112 bags
cost \$2.27 for 60 lb. bag.

Total area of the floor: _____
Amount of bags needed: _____
Total cost of the concrete: _____
