

# SHOW ME THE MATH

Name \_\_\_\_\_

A concrete slab is used in home construction. How much will the concrete cost if a 4" x 2' x 2' or 4 ft<sup>2</sup> takes three 60 lbs bags?

**With a 4-inch base for the entire floor, determine the amount of concrete needed and the cost.**

<p>Concrete 60 lb. bag \$3.25 Amounts over 112 bags cost \$2.27 for 60 lb. bag.</p>
---

<p>Total area of the floor: _____</p> <p>Amount of bags needed: _____</p> <p>Total cost of the concrete: _____</p>
